REMARKS

25X1X

At a conference held at the Soviet construction headquarters in Werder on 24 March 1953 the designs for the improvement of Parchim airfield were approved by Lieutenant Colonel (Engr) Kuznetsov (fnu). The designs had been submitted by the Baunton Spree. The pinpoint location of aircraft revetments scheduled to be constructed at the field were shown on a 1:5000 map. The Soviets stressed the point of rigid economy and construction costs were to be held down to a minimum. A cost for construction work required before the installation could be put into operation was fixed at 5.6 million eastmarks, while a sum of 1.3 million eastmarks was to be spent on the second construction stage which was to include the erection of aircraft revetments.

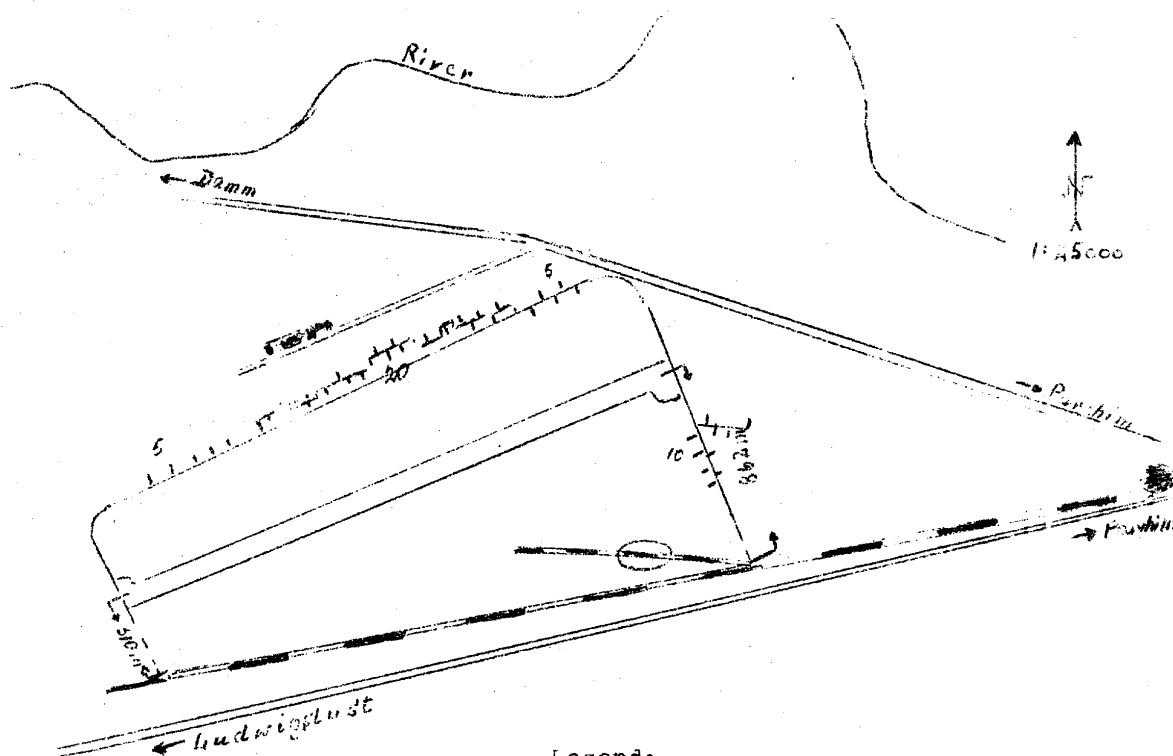

25X1A

Comment. For pinpoint location of the 40 aircraft revetments, see Annex. Lieutenant Colonel (Engr) Kuznetsov (fnu) is reported for the first time.
